	Examiner Elizabeth M. Cole	Art Unit 1771	

– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1771

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-4, 11, 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Konen, U.S. Patent No. 3,705,645. Konen discloses an inflatable structure which comprises first and second fabric layers which are placed on top of each other and bonded to form an air way. The air way may be circular. See col. 5, line 59 – col. 6, line 41. The structure is useful as an air mattress or other inflatable structure. The recitation that the material is a garment has not been given patentable weight because no garment structure is set forth and because the inflatable structure of Konen meets all the structural limitations and is capable of being used as a garment.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Konen, U.S. Patent No. 3,705,645 in view of Chen, U.S. Patent No. 5,711,041. Konen discloses an inflatable structure as set forth above. Konen differs from the claimed invention because Konen does not disclose the airway has a serpentine shape. However, since Konen teaches forming inflatable containers, envelopes or bags which

may be filled with air or another gas, it would have been obvious to have selected the particular shape for the airway which was desirable depending upon the intended use of the inflatable structure. Konen also does not disclose attaching a source of compressed gas to the inflatable structure. However, Konen does teach that the inflatable structure can be an air mattress. Chen is relied on to show that it is well known to attach pumps to air mattress in order to inflate the air mattress. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have attached a gas source such as a pump to the inflatable structure of Chen, motivated by the expectation that this would make it much easier to inflate the structure.
